Project Design Phase | Problem – Solution Fit Template

Date: 27-10-2026 | **Team ID:** SWUID2026403175 | **Project Name:** Agri-Tech

Problem – Solution Fit Overview:

The Problem–Solution Fit ensures that the Agri-Tech platform addresses key gaps in modern farming and aligns with the real needs of farmers. This validation is critical before scaling the platform.

Purpose:

- Bridge the gap between traditional farming practices and modern, data-driven technology.
- Offer a unified platform for weather, soil, pest, resource and expert support without relying on multiple tools.
- Help farmers increase crop yield, reduce loss and adapt to changing environmental conditions.
- Provide accessible, multilingual tools suited to different regions and literacy levels.
- Improve farming decisions through real-time alerts, analytics and expert consultation.

Problem Statement:

Many farmers face challenges such as:

- Unpredictable weather with no farm-specific real-time forecasts
- Late detection of pests and poor visibility of soil health
- Limited access to agricultural experts and reliable advice
- Unclear resource prices and no order tracking
- Digital tools that are complex and not available in local languages

Solution:

Agri-Tech, a full-stack MERN smart farming management system, offers:

- Farm profile setup and crop monitoring with activity logs
- Soil health analysis and graphical reports
- Real-time weather forecasting and pest alert notifications
- Resource purchase and order tracking
- Expert consultation and community forums
- Responsive, multilingual interface with secure role-based access
